REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be a non-obvious improvement over the invention of U.S. Pat. No. 6,019,573 (Uematsu et al.). The improvement comprises the use of two cooling circuits both containing first, second and third regions for stream cooling and fourth, fifth and sixth regions for air cooling. Although, Uematsu et al. discloses the use of both air and steam cooling they are not used in a combined cooling circuit as claimed. Further, it would not have been obvious to one of ordinary skill in the art to modify Uematsu et al. in order to achieve a turbine shaft having two cooling circuits both utilizing steam and air as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION
